

Retroscreen Virology Limited – An overview and insight

Retroscreen Virology Limited is a fast-growing, innovative Contract Research Organisation specialising in the conduct of respiratory viral challenge clinical trials (Phase I & II).

Retroscreen has pioneered a novel clinical trial Human Challenge model which allows our customers to gain valuable insight into their vaccines and anti-viral products in a fraction of the time it takes using standard field based clinical studies.

The Position:

We are currently recruiting to fill several research physician posts at long term contract and locum level.

The Role:

As a Retroscreen Research Physician, you will be involved in:

- the medical screening of subjects for our studies.
- taking informed consent.
- taking detailed medical histories.
- conducting physical examinations.
- conducting study specific medical procedures.
- the assessment of subjects against protocol-specific criteria.
- undertaking the medical management of subjects upon admission to the quarantine unit.
- participating in the viral inoculation process.
- monitoring subjects throughout their stay in quarantine, and for their follow up study visits.

Required Physician Profile:

- Minimum of 2.5- 3 years of post graduation experience (i.e. SHO/ST job in an Internal medicine post or allied specialty).
- Current ALS/ACLS certification.
- Fluency in English.
- Experience of working within the UK healthcare structure.
- Excellent communication and documentation skills.
- Ability to work in a clinic and in a quarantine environment.
- Flexibility to be able to work weekend and evening shifts.
- Availability for quarantine training days pre quarantine.
- Ability to work well within a team.
- Previous experience in research is desired but not required.
- Willing to receive influenza vaccination or prophylaxis (Tamiflu)
- Hepatitis B immunity documentation.

You will be required to undergo an orientation and training programme to familiarise yourself with the principles of clinical research (i.e., ICH GCP), local regulations regarding the conduct of clinical studies, and Retroscreen specific standard procedures.

For physicians interested in locum work, you may be involved in only certain stages of the project - either the clinic or the quarantine phase.
