

Senior Clinical Scientist
Location: Welwyn only

We are a world leader in the provision of innovative new therapies and now seek to appoint a suitably qualified and experienced Clinical Scientist to work in the area of immunology.

This is a varied role that will deliver challenges within a number of projects and studies, including developing and writing clinical plans and protocols, ensuring we meet best clinical practice standards and evaluating operational procedures. You will oversee the daily activities of our clinical science specialists, therefore you will require good interpersonal skills as well as an impressive history of delivering competence, ideally within an internationally based pharmaceutical or academic environment.

As an influential member of our team, you will contribute to the content of reports, publications and data for presentation both internally and occasionally externally with Health Authorities. You will also monitor, interpret and evaluate data for publishing into a global clinical development plan or clinical study protocol.

Along with demonstrable experience, you should hold an appropriate medical qualification, ideally with a post graduate degree. This role can be undertaken at a Senior level for those with relevant experience in immunology, where the additional responsibilities include delivering the clinical content of license applications, direct man-management and an understanding of FDA, ICH and global regulatory requirements.

For more information or to apply online please visit www.rocheuk.com or call the Senior Recruitment Officer on 01707 366 477.

Clinical Science Leader

Location: Based Welwyn, Nutley or SSF

Setting the pace for innovation in healthcare, Roche focuses on developing medicines and diagnostics that help patients enjoy longer, better lives. Applying your scientific and clinical expertise to the full, you will drive forward the development of cutting-edge global products in the area of Inflammation.

This will give you responsibility for the clinical and scientific development of drugs from program inception, design implementation and analysis through to presentation as part of a regulatory submission or publication to the medical community. In particular, you will ensure that the Life Cycle and Development Team enjoys timely access to high quality scientific and clinical input.

To be equal to the challenge, you will require both a medical qualification (MBBS or equivalent) and a specialty qualification in rheumatology, immunology or a related discipline (CCST, Board certification or equivalent). At the same time, you will possess a postgraduate research degree (ideally a PhD) and be an acknowledged leader in your field, with a strong track record of research in peer-reviewed publications. Finally, experience of leading a multinational research team within a pharmaceutical industry or academic environment would be advantageous. Leadership experience is mandatory/essential.

If you are proud of contributing and believe you have the commitment to teamwork and innovation that we are seeking, then Roche is the organisation for you. In return, we offer a competitive salary plus all the benefits you would expect from a leading blue-chip company, including heavy investment in your professional development.

For more information or to apply online please visit www.rocheuk.com or call the Senior Recruitment Officer on 01707 366 477.
